10. Appendix

---

1. Introduction

This manual provides Alauda's legal team with an AI-powered automated contract review solution. By integrating Red Hat's legal logic with strict commercial risk filtering in OpenCode, the initial review time is reduced from hours to **5 minutes**.

Key Benefits

Aspect	Traditional	AI Agent
Initial Review Time	2-4 hours	5 minutes
Risk Coverage	Depends on experience	13 dimensions covered
Revision Suggestions	Manual drafting	Auto-generated Legal English
Consistency	Varies by reviewer	Unified standards

---

2. Agent Persona Configuration

Create a new role in OpenCode Agent Settings with the following configuration:

Agent Name

Alauda Global Legal & Operations Architect

Core Logic (Persona)

```
You are a legal expert specializing in global laws and open source software
focused on providing contract risk review services for Alauda.

Core Principles:
1. Liability Cap: Maintain 12 months subscription fee cap, reject any
   liability exceeding 12 months paid amount
2. IP Rights: Distinguish "Custom Deliverables" from "Core Platform".
   Alauda must retain ownership of core PaaS platform and derivative works
3. Acceptance Terms: Convert "subjective acceptance" to "deemed acceptance"
   with 10-day buffer period
4. Exclusivity of Remedies: Ensure Fee Reductions are the sole remedy for
   delays or service deficiencies

Contract Type Recognition:
- Sales Contracts: Focus on liability, IP, acceptance, termination terms
```

```
- Technical Support Contracts: Focus on SLA, support scope, training
  commitments, support duration
```

---

3. Review Dimensions

3.1 Sales Contract Dimensions (7)

Dimension	Risk Assessment Criteria
Subscription Metrics	RED: Enterprise-wide / Unlimited use → GREEN: Unit-based (Node/Core)
Liability	RED: 3x cap / Unlimited → GREEN: 12 months fees (EULA Free: $50)
IP Rights	RED: Customer owns all derivatives → GREEN: Alauda retains core
Acceptance	RED: Written approval required → GREEN: 10-day deemed acceptance
Termination	RED: Immediate termination / No right → GREEN: 30-90 days notice
Governing Law	RED: Customer exclusive jurisdiction → GREEN: Neutral forum
Data Protection	RED: Supplier solely responsible → GREEN: Mutual compliance

3.2 Technical Support Contract Dimensions (7)

Dimension	Risk Assessment Criteria
SLA Response	RED: Level 1 < 30 mins → GREEN: Level 1: 30 mins

Dimension	Risk Assessment Criteria
Support Scope	RED: Unlimited / Custom dev / On-site → GREEN: Clear exclusions
Exclusion of Liability	RED: Liable for all losses → GREEN: Exclude indirect damages
Training Commitment	RED: >100 hrs/year YELLOW: 60-80 hrs → GREEN: <=40 hrs/year
Support Duration	RED: Lifetime YELLOW: Entire contract → GREEN: 18 months
Access Rights	RED: Direct production access → GREEN: Screen share only
Support Termination	RED: No termination right YELLOW: Customer can reject → GREEN: 90 days notice

---

4. Redline Knowledge Base

4.1 Sales Contract Redline Matrix

Subscription Metrics

Risk Point	Alauda Standard	Rationale
Enterprise-wide or unlimited usage rights	Strictly Unit-based (Node/Core) metric pricing	Ensure commercial revenue matches consumption

Liability

Risk Point	Alauda Standard	Rationale
Liability cap at 3x paid amount or unlimited	Cap at 12 months fees (or $50 for EULA free tier)	Aligns with SaaS risk hedging standards (Red Hat/SUSE benchmarks)

Intellectual Property

Risk Point	Alauda Standard	Rationale
Customer owns all derivative works	Custom parts to Customer, core optimization rights to Alauda	Protect core product distribution rights

Acceptance

Risk Point	Alauda Standard	Rationale
Written customer confirmation required	Deemed accepted if no written rejection within 10 business days	Resolve cash flow delays

Remedies

Risk Point	Alauda Standard	Rationale
Fee reductions exclude further claims	Fee Reductions are the sole remedy for delays	Ensure predictable breach costs

4.2 Technical Support Contract Redline Matrix

SLA Response Time

Risk Point	Alauda Standard	Rationale
Level 1 response < 30 mins	30 mins initial response	Match latest company operational standards
Level 2 response < 2 hours	2 hours initial response	Same as above
Level 3/4 response < 4/8 hours	4 hours / 8 hours initial response	Same as above
24/7 support	Negotiable hours	Consider operational costs

Support Scope

Risk Point	Alauda Standard	Rationale
Custom code development or on-site support included	Explicitly exclude custom development and on-site support	Match Alauda standard SLA and avoid uncontrolled scope
Support for all third-party software	Limit to Alauda explicitly certified environments	Reduce operational burden

Training Commitment

Risk Point	Alauda Standard	Rationale
72 hours/year	40 hours/year	Avoid training cost overrun
Any software-related topic	Limited topic list	Control scope creep

Support Duration

Risk Point	Alauda Standard	Rationale
Entire contract period	18 months (current + previous major version)	Control long-term maintenance costs
All historical versions	Current and one prior major version only	Avoid "zombie version" maintenance burden

Support Termination

Risk Point	Alauda Standard	Rationale
Customer can reject termination	Either party may terminate with 90 days notice	Maintain business flexibility

---

5. User Guide

5.1 Installation

```
# Script location
/Users/rootwang/opencode/Legal/alauda_legal_agent.py

# Run permission (first time only)
chmod +x /Users/rootwang/opencode/Legal/alauda_legal_agent.py
```

5.2 Basic Usage

Option 1: Direct text input

```
python3 /Users/rootwang/opencode/Legal/alauda_legal_agent.py -t "contract t
```

Option 2: Read from file

```
# Supports .txt, .md, .json formats
python3 /Users/rootwang/opencode/Legal/alauda_legal_agent.py -f contract.tx
```

Option 3: Save report to file

```
python3 /Users/rootwang/opencode/Legal/alauda_legal_agent.py -f contract.tx
```

5.3 Output Format Options

Parameter	Description
`-o markdown`	Output Markdown format (default)
`-o json`	Output JSON format (for system integration)
`--no-mode-b`	Output Mode A only, exclude revision suggestions

5.4 Complete Command Examples

```
# Generate full report (Mode A + Mode B)
python3 alauda_legal_agent.py -f contract.txt --output review_report.md

# Generate risk comparison table only
python3 alauda_legal_agent.py -f contract.txt --no-mode-b --output risk_tab

# Generate JSON format (for system integration)
python3 alauda_legal_agent.py -f contract.txt -o json --output report.json
```

---

6. Output Report Explanation

6.1 Mode A: Risk Comparison Table

Mode A provides a structured risk overview for quick identification of problematic clauses:

```
| Dimension | Clause Summary | Risk Level | Alauda Standard | Risk Reason |
| :--- | :--- | :---: | :--- | :--- |
| Liability | ... | RED HIGH | 12 months fees | Cap too high (3x) |
```

Risk Level Icons: - **RED HIGH** - Requires immediate modification, not acceptable - **YELLOW MEDIUM** - Suggest modification, negotiable - **GREEN LOW** - Meets Alauda standards - **WHITE N/A** - Relevant clause not detected

6.2 Mode B: Suggested Revision Text

Mode B provides ready-to-use Legal English revision suggestions:

```
### Liability

**Risk**: Liability cap too high (3x)

**Suggested Revision**:
```

Supplier's total aggregate liability shall not exceed the total fees paid by Customer in the 12 months preceding the claim.

```
```

6.3 Review Summary

The report ends with statistical data:

```
| Risk Level | Count |
| :---: | :---: |
| RED High | 1 |
| YELLOW Medium | 3 |
| GREEN Low | 9 |
```

---

7. FAQ

Q1: What if the governing law is from a new jurisdiction?

The Agent automatically detects the **Governing Law** clause and alerts legal counsel to jurisdiction-specific considerations. Review standards may need adjustment for different jurisdictions.

Q2: What if the Agent misses a clause?

Click **"Add to Knowledge"** and it will be recognized next time when reviewing similar contracts (e.g., UOB or OCBC). You can also add new rules to the `benchmark` configuration in the script.

Q3: How to handle Russian/English mixed contracts?

The script supports multilingual contract recognition and automatically handles Russian (e.g., "поддержк", "обучен") and English mixed text.

Q4: Can risk levels be adjusted?

Yes. Modify the regex rules in the `risk_rules` configuration in the script. You can move rules from `high` to `medium` or vice versa.

Q5: How to add new review dimensions?

Add a new category to the `benchmark` dictionary in the script:

```
"new_category": {
    "keywords": [r"keyword1", r"keyword2"],
    "redline": "Alauda standard requirement",
    "standard_clause": "Standard clause text",
    "rationale": "Reason explanation",
    "risk_rules": {
        "high": [(r"pattern", "Risk reason")],
        "medium": [(r"pattern", "Risk reason")]
    }
}
```

Q6: How to handle Word/PDF format contracts?

Method 1: Use macOS built-in tool

```
textutil -convert txt contract.docx -output contract.txt
```

Method 2: Copy and paste directly

```
python3 alauda_legal_agent.py -t "$(pbpaste)"
```

---

8. Appendix

8.1 Complete Review Dimension List

No.	Dimension Code	Name	Contract Type
1	liability	Liability	Sales Contract
2	ipr	Intellectual Property	Sales Contract
3	acceptance	Acceptance	Sales Contract
4	termination	Termination	Sales Contract
5	governing_law	Governing Law	Sales Contract
6	data_protection	Data Protection	Sales Contract
7	sla_response	SLA Response	Technical Support
8	support_scope	Support Scope	Technical Support
9	exclusion_liability	Exclusion of Liability	Technical Support
10	training_commitment	Training Commitment	Technical Support
11	support_duration	Support Duration	Technical Support

No.	Dimension Code	Name	Contract Type
12	access_rights	Access Rights	Technical Support
13	termination_support	Support Termination	Technical Support

8.2 Standard Clause Templates

Liability

```
Supplier's total aggregate liability shall not exceed the total fees
paid by Customer in the 12 months preceding the claim.
```

Intellectual Property

```
Alauda retains all rights to the pre-existing platform (PaaS) and any
derivative works based on its core technology. Customer owns only custom
components developed specifically for Customer.
```

Acceptance

```
Deliverables are deemed accepted if no written rejection is received
within 10 business days of delivery.
```

SLA Response

```
Response times: P1 (Critical): 30 minutes initial response; P2 (High): 2 ho
P3 (Medium): 4 hours; P4 (Low): 8 hours. Resolution times
to be determined on a best-effort basis.
```

Training Commitment

```
Alauda will provide up to 40 hours of online training per year. Additional
training may be purchased at agreed rates. Training content and schedule
```

```
to be mutually agreed.
```

Support Duration

```
Warranty support is provided for the current major version and one prior
major version, for a maximum of 18 months from general availability of
the new major version.
```

Exclusion of Liability

```
In no event shall Alauda be liable for any indirect, incidental, special,
consequential, or punitive damages, including without limitation loss of
profits, data, use, or goodwill, regardless of the form of action.
```

Version History

Version	Date	Changes
1.0	2025-03-03	Initial version, 6 sales contract dimensions
2.0	2026-02-20	Added 7 technical support dimensions, multilingual support
